

## Senior Manager, Security and Loss Prevention Manager

Do you have a Bias for Action?

Would you rather work for the disrupter, or the disrupted?

Are you up for creating solutions and solving tomorrow's problems today?

### **We're glad to hear it.**

Since opening in 1995, we've been pushing the boundaries of possible further and further. Today, we're a Fortune 500 organization that relies on Amazon's security systems and World Wide Loss Prevention Programs, especially in the fast-paced environments of our Fulfillment Centers (FCs).

These FCs are at the heart of our rapidly growing business: they're where we manage a vast range of our fast-moving inventory. Our FC teams stow deliveries, pick products, package them up and ship them out: each of these groups have played their part in taking us where we are today.

You'll join an FC as a member of the senior management team, where you'll manage, coordinate and implement all aspects of our loss prevention strategy.

### **Your mission:**

The main areas of focus for you will include:

- Loss exposure and loss controls analysis,
- Loss investigation, and when necessary, theft investigation,
- Physical security systems and controls,
- Contracting guard services,
- Loss prevention education and awareness,
- Thorough loss prevention audit programs.

**At Amazon we believe that every day is still day one. A day to take a first step. A day to look forwards to new challenges. And today is that day for you. It's your day to be part of something great. A day to make your ideas come to life. And your day to join a company that redefines itself every day. That's the energy and passion behind Amazon.**

We are looking for a Regional Loss Prevention Manager to join us in our network in Germany. As a Senior Manager, you will lead the effort to efficiently and effectively provide security services and asset (lives, buildings, equipment, data, & intellectual property) protection within Amazon's fulfilment centres throughout continental Europe.

### **Key Responsibilities:**

- Ensure data protected to IT security and related physical security standards including access control and system monitoring and that MDF rooms to eliminate possibility of data theft or operational disruption
- Provide leadership, advice and support (software, equipment and other tools, reports and data) to your Security and Loss Prevention team
- Enhance, track, and report on metrics which are key performance indicators (the speed they identify root causes of defects)
- Serve as department's liaison and security subject matter expert for senior management
- Develop business cases which receive the required approval, financial and technical resources, and the support of appropriate management
- Utilize Lean and Six Sigma methods to drive process improvements and increase efficiency

- In cooperation with the Worldwide Security team, effectively and efficiently enhance and standardize your services, programs, policies, procedures and systems
- Support Internal Audit Team as required
